INSTRUCTIONS

Tough Screen provides fabric and carpet with protection that offers excellent resistance to most stains, and soils while not changing the "hand" or texture of the material. **Tough Screen** repellent makes liquids bead up for easy removal. Clean fabrics look new longer.

Any soil or stain should be removed as soon as possible. Use a dry cloth to blot stain first. If required, follow by blotting with a damp cloth then blot with a dry cloth again. Do not attempt further restoration without professional advice.

While fabrics treated with **Tough Screen** will be easier to wash and/or dry clean - over a period of time, repeated cleanings can reduce the protection offered by Tough Screen.
